

Console Systems

Our EASYfit Console air conditioners are specially designed to be installed on the floor or lower wall. They comprise two elements - an internal and an external unit. The elegant and thin unit body complements the existing decor and saves space whilst the external unit is situated outside the building. The two are connected using copper pipe. The external unit or condenser removes the heat from the room and dissipates it outside along with any condensation that's built-up in the system whilst the internal unit provides cooling.
